

PRODUCT SHEET

Discover why 2,400 facilities have chosen TELCOR for their POCT solution.

As testing requirements are enhanced and technology improves, more point of care device types are available. Despite the many shapes and sizes of point of care devices, there is one goal: to provide exceptional patient care. TELCOR QML® is designed to provide a solution without limitations, supporting the management and reporting requirements of the growing point of care industry and connecting all device types—regardless of manufacturer, number of devices, or number of facilities.

QML is not only the most comprehensive point of care solution, it also connects more device types and LIS/EMR systems than anyone in the industry. This provides our customers with unparalleled point of care connectivity so you can connect “everything, everywhere, point of care™.”

UNATTENDED INTERFACES WITH UNLIMITED SUPPORT 24X7X365

EXTENSIVE MANAGEMENT TOOLS

- AUTOMATED ALERTS**
Send interface alerts via text or email
- RESULT REVIEW**
Exceptions configured by device flags, ranges or required data
- OPERATOR MANAGEMENT**
Certification and competency tracking with automatic recertification options including interfaces to LMS
- METRICS AND STATISTICS**
Track utilization, QC, TAT and more
- UNLIMITED DATA MINING**
Share results via print, fax, PDF, email or export
- SECURITY**
Compliant with HIPAA, HITECH; access by role and area
